SHIP LOADING SYSTEMS FROM ZUTHER

We offer a wide range of different solutions for ship loading. Our goal is always to avoid or reduce the number of times ships have to change position in order to make the loading process as efficient as possible for the customer. Our loading systems are available in a wide variety of designs, e.g. swivelling up to 180° and equipped with a telescopic conveyor belt. This technology proves its reliability in many different ports.

*Approximate capacity in t/h at 0.75 t/m³
