

# SLIDING BELT CONVEYOR

## Single-variety conveying due to divided sliding trough

Our sliding belt troughed belts are created for low to medium performance. Our design is convincing with its compact design as a box belt, single-variety conveying and attractive purchase costs. The divided sliding trough not only avoids the use of complex idler stations, but also enables sorted conveying. sorted conveying. The conveyor is particularly suitable for seeds or unpackaged foodstuffs. Discharge of the of the residues via the belt scrapers mounted on the sliding floor. With optional belt covers and bottom plates, this system can be this system can be completely enclosed and aspirated.

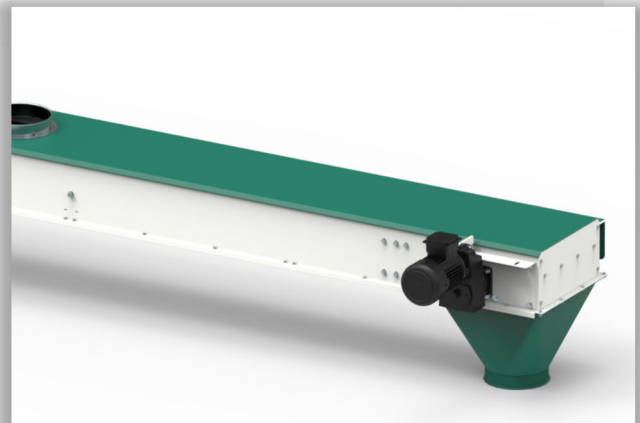

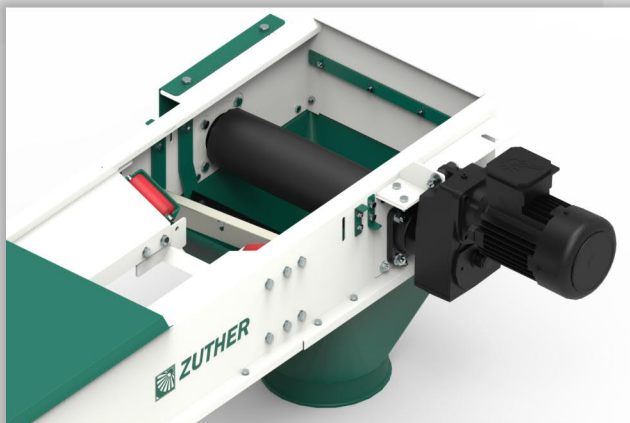

- single-variety due to divided sliding trough
- Performance up to 70 t/h
