

V-TROUGH CHAIN CONVEYOR

Experience from 100 years - Your specialist for conveyor technology

The trough chain conveyors of the V-CONVEYOR series are made of galvanized material and are also suitable for outdoor use due to the standard and are suitable for outdoor use due to the standard racking collar. The conveyor is equipped with a V-bottom, which enables residue-free conveying. The conveyor chain is also equipped with V-shaped flights, which are made of a particularly slippery material. All drive components that are used in this series meet a high quality standard and guarantee reliable operation under the most difficult operating conditions. The conveyor allows various capacities, from 20 - 500 t/h.

V- trough chain conveyor TYP TKF R26 - R82

- Residue-free conveying due to V-bottom
- V-driver made of slidable plastic
- Sheet thicknesses: Bottom/sides 3mm, cover 1.5mm
- Various performances possible
- Suitable for seed
- modular system
- also available in stainless steel

Price / Performance ratio

Through standardization and the use of the latest manufacturing technologies, we are able to produce high-quality conveyors at attractive prices and guarantee flexible customer service.
