

BELT CONVEYOR

The troughed belt conveyors allow a very large performance range of up to 1,000 t/h and bridgeable distances of well over 150 meters. The idler stations are very high quality, low maintenance and require low maintenance costs. Our conveyor belts are characterized by their reliability and universal application range. Whether grain, minerals or fertilizer: we find the best solution for every requirement. The design is also available in stainless steel (1.4301), which is particularly suitable for fertilizers. In addition, conveyor belts are a central element of our very efficient, fully automatic hall feeding system for flat stores.

- Up to 1,000 t/h per hour, customer-specific also higher
- Suitable for unpackaged foodstuffs with BGA approval
- Suitable for sensitive and abrasive materials to be conveyed
- Cost-effective thanks to modular system
- Compact and lightweight
- Low operating costs

- Suitable for long distances
- Suitable for various bulk materials
- Diverse applications
